Das Projekt Horizon 2020 "Empowering patients by professional STress Avoidance and Recovery Services" (STARS) wurde im Januar 2017 gestartet und hat eine Laufzeit von 48 Monaten. Der Zweck der vorkommerziellen Auftragsvergabe von STARS ist es, eine neue Technologie zu entwerfen, zu prototypisieren und zu testen, um Stress und Ängste von chirurgischen Patienten während des Pflegeprozesses zu reduzieren und eine aktive Rolle des Patienten und des Pflegepersonals im Gesundheitsmanagement in den folgenden Phasen zu fördern: präklinisch, klinisch und postklinisch. STARS ist ein von der Europäischen Gemeinschaft finanziertes PCP-Projekt (Pre-Commercial Procurement), das von der Universität Maastricht (Niederlande) koordiniert wird, an dem 10 weitere europäische Partner beteiligt sind.
